EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In the specification, page 1, line 4,

"now allowed" has been changed to -- now US Patent No. 6,700,423 --.

3. The following is an examiner's statement of reasons for allowance: Claim 1 is allowed.

Claim 1 is allowed because the prior art of record fails to disclose or suggest the inclusion of a pulse width control circuit which includes first, second and third current mirror circuits specifically connected with the bit detection element as recited. The inclusion of the recited structure defines patentability over the prior art of record because it defines a distinguished structure of the rise/fall control section which is not taught by the art of record, alone or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
